

From pyramids to planets

WHAT have the pyramids got in common with the planets? Year 4 children entered the Science Dome this week to find out. As part of their theme 'walk like an Egyptian' they learnt that the Egyptians used the night sky and the stars to determine what time of year it was. They then used this to know when plant their crops and when to harvest them. Their time in the dome ended with an exciting roller coaster ride through the planet Saturn!

Earlier on in the day Year 3 children had their turn in the dome. Year 3's current theme is 'Let there be light' and they had the chance to learn about the science of light. They found out that

light is a form of energy and how it travels. Their experience was also concluded with an exiting rollercoaster ride through the solar system.

Let's talk about relationships

WE hope you have all read the letter this week about the new RSE element of our PSHE curriculum (Jigsaw). This is an important subject that gives children the knowledge and understanding that they need to keep themselves safe and to develop emotionally stable and healthy relationships. As part of these changes we would like to invite you all to come and look at some of the resources we will be using. They will be displayed in the hall after school on Thursday 10 May. There will be some staff and Governors available to address any questions you may have.

Wear it orange!

Don't forget next Friday on 11 May to wear

something orange to support Allergy Awareness.

All other items of clothing must be uniform.

The sun has got his hat on!

IF the weather reports are to be believed this weekend should be a hot one! Please remember that on hot days children should have sunscreen applied before coming to school. Staff are not permitted to apply cream to children. If your child is exceptionally fair and needs to reapply during the day the sunscreen should be clearly marked with the child's name and the child must be able to apply it themselves. The sun should not be the only one with his hat on, bring your sun hat to school during spells of hot weather.

Super SAT's

IT's that time of year again. Our Year 6 children are currently studying really hard to prepare for the SAT's. Year 2 children are also working hard towards their SAT's. During this period of assessment and testing for all years it is so important for the children to arrive on time. It is less stressful for them if they arrive at the same time as their classmates. A good hearty breakfast will enable them to concentrate and don't forget the all important water bottle!
