## SCIENTIST REVEALS DETAILS OF FIRST EVER TRIP IN TIME MACHINE

PHOTO OF DR. KAI'S TIME MACHINE

After many years of testing, Dr. Kai has achieved the impossible and travelled in a time machine to discover different worlds. In an interview with Dr. Kai he explained how he had

been educated and working in Oxford University for many years. He found a lost time machine in a secret underground laboratory that was covered in wires. He then cut and moved

the wires and was shocked at his discovery. Dr. Kai tried to go in but nothing happened. He thought it didn't work so he tried to fix it. He asked his friends but they could not help him so he continued to fix it again, this time more determined than ever and something amazing happened. Dr. Kai explained that he inside and found

a diamond shaped key which he used to start the machine. Once he got some fuel through a grade of streets he was able to start his adventurous discoveries. Dr. Kai went on to describe and show me pictures of the fascinating worlds he discovered.

The first journey he made took him a while day and he found a world full of streets which he named Candy-land. He described Candy-land as sweet,

sugary, tasty and yummy. Dr. Kai said "the floor was made of jellies that you could jump on like a bouncy castle". Dr. Kai kept on jumping and saw the sky was made of cotton candy in multicolored mixtures of blue, green, orange and pink. "It smells

like I was inside a lollipop" he said. While I was jumping he saw friendly ginger bread people sitting in a castle made from gingerbread in decorative icing.

It looked really nice he said. There were also lollipops sticking out of the ground and bushes made out of nutella which tasted more chocolatey than ever tasted! There were also trees made out of black licorice sticks with

gummy bears hanging from them like different fruits. He went on to describe a long cookie road that lead to a large strawberry with fountain that created a frothy base and pretty bubbles. Dr. Kai said it was like a dream and tasted phenomenal.

The next world Dr. Kai discovered also took him a whole day to travel to using his diamond key. He went on to describe this world as being run by robots and a place where a human could relax. While the robots did everything! Dr. Kai named this world as Botax. He explained that this

PHOTO OF: BOTAX

World was completely different to the last world, it was quite eerie. There were robots everywhere and they did everything, even the chairs and houses were robotic! Dr. Kai went on to say that he was given a drink and plate of food by a friendly robot, but unfortunately he could not take them as the drink was gold engine oil and the plate of food was full of random nuts and bolts. Dr. Kai explained

that it was clear there were no humans around so he thought he should leave quickly. He went to his time machine, after one day he got home and was relieved.

When I asked Dr. Kai what's next for him, he said that his next adventure would be to travel into the past and meet the dinosaurs! I can't wait for that! I'm sure you would agree this was a fantastic achievement for Dr. Kai and

We look forward  
for his next journey

Jaida - Mai

The Star Of Light

I have been in many adventures,  
The star of light is with me.  
I have been in Candy - Land, The  
star of light is following me.  
I have been in Bollyx, The star of  
light is coming to me.  
I have been everywhere I will  
share the experience with you.
