

## Science

LO: To understand why animals live in different habitats and how they are suited to the habitat they live in.

Can you remember what habitat means?

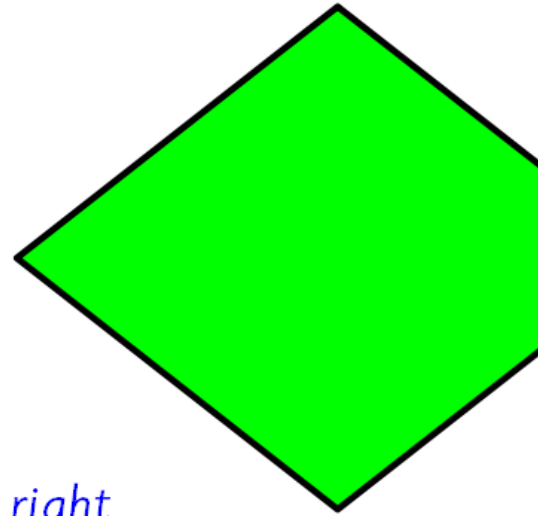

*Where an animal lives*

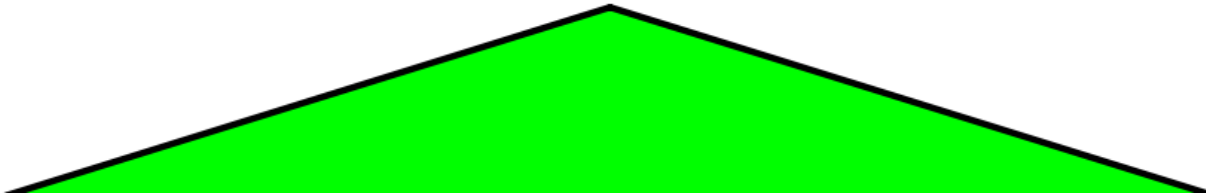

*Where they can get appropriate food, water and shelter.*

# **Habitat**

-

*Where an animal fits in - it has the right adaptations to suit that environment.*

What does a polar bear need  
to be happy?

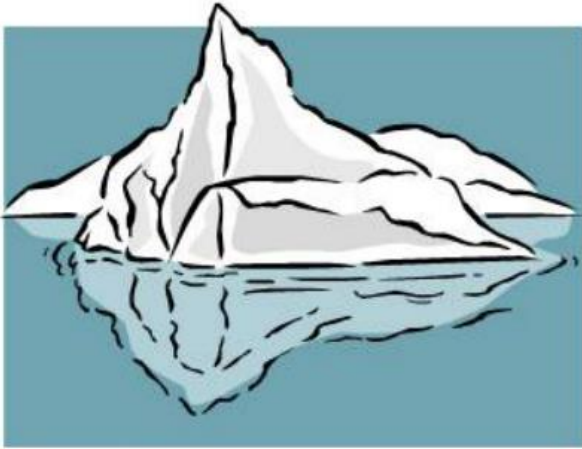

Empty rounded rectangular box for writing.

Empty rounded rectangular box for writing.

Empty rounded rectangular box for writing.

What does a polar bear need to be happy?

what does a rabbit need?

what does a rabbit need?

Read Henry's holiday or click on  
<https://www.youtube.com/watch?v=LwHWmUWi6Ck>

What type of habitat does a penguin live in ?

Why are penguins suited to this kind of habitat?

What kind of habitat did Henry travel to?

Why could he not survive in that habitat?

What kind of plants and animals live in that kind of habitat?

Your task- match up the animal and the picture of their habitat they live in.  
Write about how the animal fits their habitat!

E.g. A fish lives in an ocean habitat.  
Fish have gills to breathe underwater.

**Animals and their habitats**

**Learning Objective**  
I can match animals to their habitats.

**Activity**  
On the following pages, you will find some pictures of animals and some pictures of habitats. Carefully cut out each picture, match each animal to its habitat. Think of one or two things that the habitat provides for the animal, such as **water, food, shelter, warmth, or protection**.

Which animals were the easiest to match to their habitats? Why?  
Which animals might belong to different habitats?  
Which animals might you find in the wild in this country?

Organism		What does this habitat provide?
Organism		What does this habitat provide?
Organism		What does this habitat provide?

Can you guess the animal?

I have sharp teeth to catch my prey.

I have gills to breathe underwater.

My babies are called pups.

Who am I?

A shark!

Here is a challenge for you if you fancy it!

*Create your own 'Guess Who?' game about an animal. Think about how it fits into its habitat.*
