

Dear Parents/Carers,

12 March 2021

Design a lab coat competition

As part of a celebration of science in school, we will be running a competition for the children to design a lab coat. The children will be bringing home a template with room for them to design the back and front of the lab coat. They need to design a lab coat that illustrates what science means to them. This could be illustrations of their favourite science topics, science that affects life on our planet or anything that makes them think of science and the bigger picture. The more creative, the better!

Once the children have completed their design, they should return their entry to their class teacher by **Wednesday 31st March**. We will be choosing the best designs from across the school and there will be prizes for the winning designs. A selection of the designs will also be sent off to the National Baylab British Science Week competition to try and win some science equipment for our school.

Here are a few tips for creating an exciting design:

- Use lots of bold colours to make your pictures stand out.
- Include different ideas on each part of the coat.
- Remember to design the front and back of the lab coat.
- You can use pens, colouring pencils, coloured paper, paint, or crayons for your design.
- Make sure you use the template sent home to create your design.
- Most of all, be creative and have fun!

We really look forward to seeing your wonderful designs.

Yours sincerely,

Mrs Williams

Science Lead
